EDUCATION

BSc (Hons) Computer Science

Informatics Institute of Technology
affiliated with University of Westminster, UK
2023 - Present
Completion of second year in progress

Foundation in IT

Informatics Institute of Technology
2022
Attained Certification in Higher Education -
IT with grade Distinction

GCE O/L

Colombo South International College
2019
Completion with results: 3A 4B 2C

CERTIFICATIONS

- UOM Online Programme – Python for Beginners I & II
- Introduction to Graphic Design: Concepts - LinkedIn Learning
- Backend Web Development (Bootcamp)
- Certification - Divisional Level English Language
- Certification - Honours in Written & Spoken English
- Certification - The Prize in Spoken English

PROFILE

An enthusiast of design and full-stack development, I specialize in seamlessly blending exceptional branding, UI/UX, and design solutions with robust development skills. Known for my skill for innovation, I take pride in crafting impactful projects that leave a lasting impression. A dedicated hard worker and rapid learner, I am driven by a curiosity to continually expand my knowledge, particularly within the realm of full-stack development. Ready to contribute and excel in dynamic environments, I am committed to delivering outstanding results.

WORK EXPERIENCE

Graphic Illustrator (Intern)

Techserw Labs (Pvt) Ltd Jun 2023 - Oct 2023

- Created compelling game assets and visually appealing website visuals for the 'TechieSays Junior' project.
- Designed captivating icons tailored for the 'TechieSays Junior' website, enhancing its visual appeal and usability.
- Collaborated closely with the design team to ensure seamless brand alignment across all visual elements.
- Developed and refined digital illustration and graphic design skills to enhance project outcomes.
- Actively participated in brainstorming sessions, providing creative input to elevate project aesthetics and user experience.
- Consistently delivered high-quality work with attention to detail, exceeding project expectations.

RECENT PROJECTS

SLIIT UI/UX Design

April 2024 - Present

- Created UI/UX design for SLIIT's website, ensuring a modern, interactive, and professional user experience.
- Utilized Figma to design and prototype user-friendly interfaces, while also crafting a character illustration for the university's assistant bot icon.
- Presented and iterated design concepts to reflect SLIIT's brand identity and meet objectives.

Dilmah School of Tea UI/UX Design

Apr 2024

- Revamped the Dilmah School of Tea website as a personal project, aiming for interactivity and attractiveness.
- Employed creative strategies to enhance user experience through engaging interfaces and implementing innovative design elements.
- Independently conceptualized and executed the project, demonstrating self-motivation.
- Ensured seamless navigation and brand identity alignment with Dilmah's objectives.

TECH STACK

LANGUAGES

Python, Java, C#, Node JS

WEB DEVELOPMENT

HTML, CSS, JS, React JS

DATABASE

MySQL, Microsoft SQL Server

VERSION CONTROL

Git

UI/UX DESIGN & GRAPHICS

Figma, Photoshop, Illustrator, Canva

SKILLS

- Creative Problem-Solving
- Attention to Detail
- Time Management
- Organization
- User-Centric Approach
- Continuous Learning
- Presentation Skills
- Critical Thinking
- Meeting Deadlines

Explora - Second Year Project

Sep 2023 - Mar 2024

- Led the development of Explora, a travel planning application, during the second-year group project.
- Introduced the innovative idea of combining various travel-related features into one platform, addressing the absence of an all-in-one solution in the market.
- Adapted project scope from a mobile app to a website based on supervisor recommendations.
- Continuing the development of the application into a mobile app as a personal project, utilizing Flutter or React, to deepen understanding of mobile app development.

Property Listing Website

Jan 2024

- Designed and developed a frontend interface for a property listing website as part of an assignment for the Advanced Client-Side Module.
- Utilized React.js to dynamically fetch and display information from a JSON file, adhering to specified requirements.
- Acquired proficiency in React.js through hands-on application during the project

Portfolio Website

Nov 2023

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase my projects, skills, and creativity.
- Usage of GitHub for version control and deployed the website using Vercel for seamless hosting and accessibility for effective self-promotion and branding.

OOP Programming Concepts

Oct 2023

- Demonstrated object-oriented programming (OOP) concepts in the OOP module by developing a console system and Graphical User Interface (GUI) using Java Swing.
- Designed the console system to enable a manager to perform tasks such as adding new products, deleting products, printing, and saving them.
- Implemented a GUI where users can select products, add them to a shopping cart, and visualize the final price, enhancing user interaction and experience.
- Created UML diagrams including a use case diagram and a class diagram to illustrate the system's functionalities and relationships between different components.

Software Development I & II

Jan 2023 - Aug 2023

- Developed a Python project for Software Development I Module, implementing a university grading and tallying system that meets specified requirements without the need to store any data.
- Created a Java project for Software Development II Module, focusing on learning ArrayLists and designing a restaurant food queue system. This system efficiently manages customer details, handles food orders, and tracks quantities to simulate a real-world restaurant experience.
